

### **C-Series High Power Laser Diode Module**

#### M878.6±0.5-60-D200/22-C5

Han's TianCheng Semiconductor Co.,Ltd., founded November 2011 Beijing Development Area, is a subsidiary company of Han's Laser. Han's TianCheng has advanced research, technological infrastructure experience in the development and production of diode lasers with self-developed technology, especially in fiber coupled laser modules. Han's TianCheng provides high power semiconductor laser products which are widely used in the fields such as material processing, diode-pumped solid-state pumping, fiber laser pumping, laser display, medical application and scientific research

Han's TianCheng dedicates to the development of high brightness fiber coupled diode laser modules with output power from ten to hundreds of watts, and the wavelength from 635nm to 1550nm. We can also provide special wavelength and multi-wavelength products, and other customizing products and OEM services.

#### Features:

- High output power of 60W
- 878.6nm wavelength locked
- 200μm core 0.22NA multimode optical fiber
- ♦ Narrow line width <0.5nm</p>

#### **Applications:**

- Fiber laser pumping
- Direct diode laser applications
